PROJECTS

Internity – AI-based Internship Recommendation Platform

Flask, Node.js, React, ML Model

- Developed a web-based AI internship recommender using Flask API and ML model integrated with a React frontend. Built modules like personalized dashboard, AI chatbot (InterAI), and resume checker for students.

Heart Disease Prediction model

Python, Scikit-learn

- Implemented Logistic Regression, random Forest, Naïve Bayes, and KNN models achieving **87% accuracy**. Conducted preprocessing, feature scaling, and comparative analysis of classification models.

- FastAPI link: <https://heartdiseasefastapi.onrender.com/predict>

Interactive Mines/Tile Prediction Game

HTML, CSS, Javascript

- Developed an **arcade-style tile guessing game** where players iteratively choose tiles to reveal either a **Win (W)** or a **Loss (L)**, with the option to **withdraw points after each successful discovery**.
